

## **Exponate SphereOptics**

On our booth we will show a variety of instruments from our Remote Sensing portfolio, for example: the Full Range Field Spectrometer PSR+3500 (350-2500nm) from Spectral Evolution. The Agilent FTIR 4300 handheld thermal spectrometer (2-15 $\mu$ m). Hyperspectral imaging sensors from NEO and Cubert as well as Zenith Lite diffuse reflectance Targets for sensor calibration.
